

Release Information for Customizer 11000

Customizer 11000 is the newest addition to the Janome's Customizer line of embroidery software. Customizer software features easy-to-use layout and stitch conversion capabilities. Stitch designs can be arranged on up to 9 pages of A4 or letter-sized templates and printed out for placement on fabric.

Customizer 11000 is compatible with the new Memory Craft 11000 model only. New purchasers of Customizer software will receive both Customizer 11000 and Customizer 10000 Plus (compatible with models MC10001, MC10000, MC9700, MC9500 and MC300E).

Customizer 11000 Features:

- * New all-in-one software integrates stitch conversion and layout features.
- * Edit designs by part, color, stitch type, pitch, density, orientation and size.
- * True view imaging allows embroidery stitches to be previewed before actually embroidering.
- * Direct PC-Link allows the user to download and upload designs to / from Memory Craft 11000 via USB cable.
- * Design rescaling allows rescaling 50% - 150%
- * Monograms (10 fonts) can be rescaled while maintaining stitch density.
- * User Define Color allows the user to define original thread colors and add to the color chart.
- * Auto Register allows quick conversion of images (.wmf & .bmp) into stitch designs.
- * Line drawing includes pencil and eraser functions that can be used to add to or cut from an image.
- * Available Hoop sizes:
 - 50 x 50 mm, 126 x 110 mm, 200 x 200 mm & 200 x 280 mm*
 - * New! Macro Hoop
 - Large-sized sliding hoop allows the user to fit embroidery creations within an expanded sewing area of 200 mm x 280 mm.
