

JANOME BULLETIN

Professional overlock accessory blister packs

Twelve new blister packs are now available in convenient blister packs including seven new accessory sets. These convenient sets combine attachments with their appropriate optional presser foot to make it easier than ever to set up the Janome 1200D and 1100D for specialized techniques. Each blister pack also includes easy-to-follow instructions.

Set Accessories

* Compatible with... **1200D only** **1100D+1200D**

1. Cover hem foot, Lace attachment, Hem & Wrapped edge guides Part No.200801407

* To attach lace to top of fabric, use Lacing Guide (F-3, not blister packed) with chain stitch foot (F).

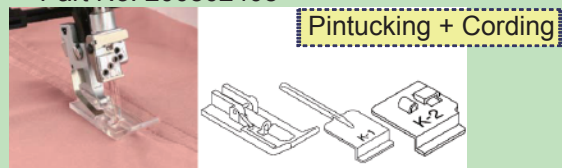

2. Chain stitch foot, Fagoting & Felling guides Part No.200803409

3. Cording foot & Cording guide Part No. 200817004

4. Pintucking foot, Pintucking & Cording guides Part No. 200802408

5. Top stitch foot & Top stitch guide Part No. 200804204

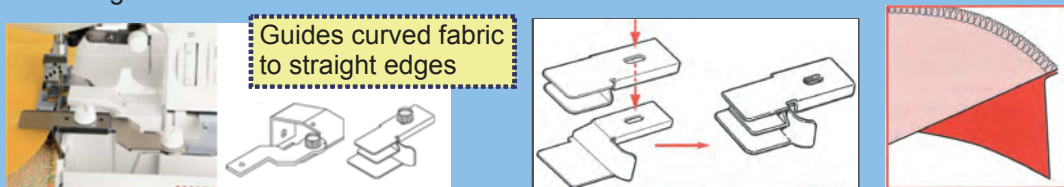

6. Elastic gathering foot & Attachments Part No. 200805401

* Turning attachments up side down makes it possible to attach gathered elastic with cover hem stitch. This technique can be used for making gathered skirt, etc.

7. Cloth guide & Attachment holder Part No. 200812205

The Cloth guide is very convenient for serging curved and straight fabrics together. This technique is commonly seen in home décor items like table cloths and bedspreads. The guide, which is separated into two parts, prevents fabrics from sticking together by static cling for smooth and comfortable serging.

Tips:

- Use your right hand to hold straight fabric in place and left hand to rotate curved fabric along the guide.
- Sew a few stitches on the straight fabric first. Then, insert curved fabric into upper portion of the guide up to just in front of the needles.
