

JANOME BULLETIN

Quilt Binder Set for 9 mm max. stitch width machines (Easy Set Bobbin compatible)

A new version of the highly popular Janome Quilt Binder Set with Easy Set Bobbin compatibility has been created for use with 9 mm sewing machines. It is also possible to attach this binder set to non-Easy Set Bobbin type 9 mm machines. You'll be amazed at how easy to use the quilt binder is and how quickly and professionally you'll be able to perform binding tasks.

Part No.: 202-211-008

Compatible with all 9 mm stitch width sewing machines (Easy Set Bobbin type or otherwise).
MC15000 / MC12000 / MC9900 / MC8900QCP / MC8200QC

Point 1 1/2" (15 mm) finished binding width

Producing a finished binding width of approximately 1/2" with enough room to handle quilt fabric and other thick fabrics. Not only does the attachment do straight line binding for large quilts, but it also adds wonderful, eye-catching accents to any small items such as placemats and hot pads.

Point 2 Finished binding widths of 5/16" (8 mm) and 7/16" (12 mm) also possible

The binder attachment plates (50mm/15mm) in the package and the 5/16" and 7/16" binder attachment plates sold with Janome's CoverPro machine can be used interchangeably to achieve another 2 binding widths.

32 mm / 8 mm Tape binder Part No.: 795-824-014

42 mm / 12mm Tape binder Part No.: 795-842-007

(can be purchased separately)

Point 3 Professional fine-tuning for a beautiful finish

The two upper screws adjust the folds to allow you to set the position of the binding's top and bottom folds. Once you have set the position of the folds, place the attachment on the base and align the folded fabric with the needle to the desired position. If you are worried about the needle not sewing on the underside of the fabric, set the binder as shown in the photo and diagram on the right below.
