

JANOME BULLETIN

Clear View 1/4" Seam Foot Compatible with Straight Stitch Needle Plate (Center needle drop position only) for 9mm max. stitch width machines

In response to requests from quilters all around the world, Janome has developed a clear view 1/4 inch seam foot for use with the straight stitch needle plate on 9 mm machines! This foot allows you to sew 1/4 inch seam piecing, indispensable for quilt work, using the straight stitch needle plate. You'll be sure to enjoy the precise and elegant finish this foot provides for your patchwork piecing!

Part No.: 202-216-003

Compatible with following models:

MC 12000 / MC9900

MC8900QCP / MC8200QC

MC12000 / MC9900	MC8900QCP	MC8200QC
<p>01 02 03</p>	<p>D1S D2S D3S</p>	<p>1S 2S 3S</p>

The foot has red lines marked on it at 1/8 inch intervals from the center needle drop position. These can be used as guide for your quilt work.

*This foot can also be used with the MC15000 but by using the right needle position of the MC15000's straight stitch needle plate with the 1/4" seam foot O (a standard accessory), or the clear view quilting foot and guide set (Optional Accessory No.: 202-089-005), the same results can be achieved.

MC15000 straight stitch needle plate

Features of Janome Needle Plates: Angles Markings

45°, 60°, 90° and 120° angles are marked on Janome needle plates. These angles are extremely useful when doing pattern piecing. When pattern piecing, stitches may be sewn on the bias line so the fabric stretches easily and it can be difficult to sew. By using this foot, the straight stitch needle plate can be used for 1/4 inch piecing so that fabric stretching is prevented and beautiful piecing can be achieved. For more details on this sewing method, please see below.

1. Cut the fabric with a 1/4 inch seam allowance, fold in half and mark the fabric center line.
2. Set the piece of fabric in place with it matched to the piecing foot guide on the right side and to the angle on the needle plate which is the same angle as the cut fabric, on the left side (the photo shows 45°).
3. By sewing up until the center line in the fabric, you can create a suitable stitch allowance at the start and end of sewing.

*Sew pieces with different angles the same way.
