

How to unpack the MC12000v101.zip file:

(for Windows XP users)

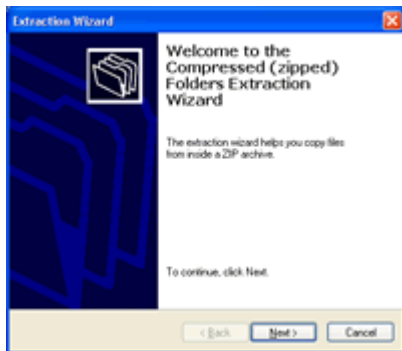

1. Double click on the UpdateMC12000v101.zip icon.

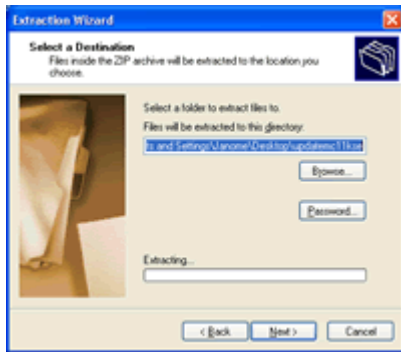

2. In the window that opens, click **Extract all files**.

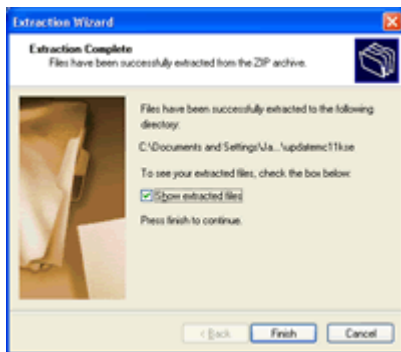

3. The Extraction Wizard opens. Click **Next**.

4. In the Select a Destination panel, select the location where you want the folder to be placed, for example, the Desktop. Click **Next**.

5. In the Extraction Complete panel, select **Show extracted files**. Check **Finish**. The unzipped files appear in a new window.

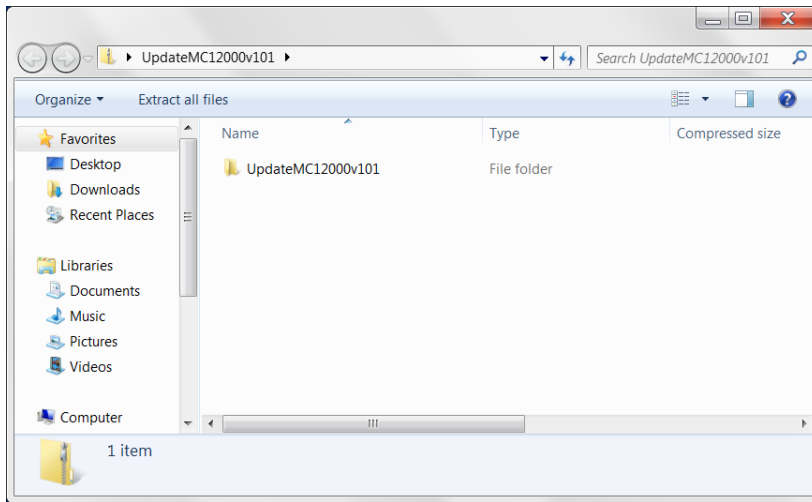

6. In the new window that opens after extracting the files, double click on the UpdateMC12000v101 folder and then double click on the UpdateTool icon.

(For Windows Vista / 7 users)

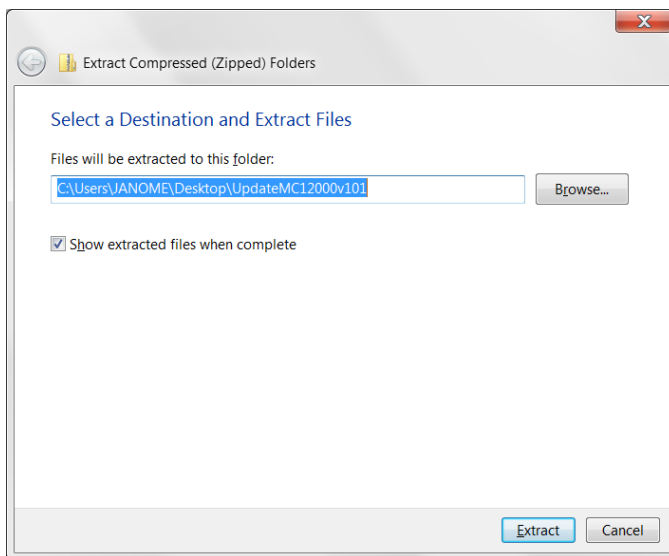

Usually on Windows, compressed applications that haven't been unpacked can not be used. After unpacking the zip file as described below, please carry out the application's boot up procedure (this is basically the same as the XP process).

1. Double click on the UpdateMC12000v101.zip icon.

2. Click on the “Extract all files” button in the window that opens.

3. Select a transfer folder and click on the “Extract” button. The transferred file will be displayed in a window.

4. Open the UpdateMC12000v101 folder by double clicking on it and then double click on the icon.

The System Update for MC12000 opens. Click the **Instruction** button to open the update instruction manual. Make sure you read the instructions in their entirety and understand them before proceeding with the update.
